Hello!

This is Ciera

she has a PhD in Plant Biology from UC Davis, where she studied the evolution of leaf shape and currently works as a computational biologist in Michael Eisen's lab. With her we will dive into the world of data science and natural museums.

Unleashing the power of biodiversity data

The first part of our meeting is devoted to exploration of biodiversity data and what the world of biodiversity data has to offer.

"RethinkR" - first session

Let's have fun coding, learning and playing with R altogether. A piece of code is in our GitHub repository.

We invite you to work with us on it!

Scenario 1

(R packages: **tidyverse**)

Scenario 2

Let's go and explore the possibilities of data visualisation!
